

Attention Boaters

Shrink Wrap & Other Materials: Recycle It!

Plastic shrink wrap is a popular and cost-effective material used by marinas and boat owners to protect boats, personal watercraft and other objects from harsh winter weather conditions, and other harmful elements.

It does, however, present a serious waste disposal problem, since there are limited recycling options for the hundreds of tons of shrink wrap discarded from vessels each spring.

Recycling keeps the material out of landfills already nearing capacity and reduces the chance that plastic material will end up in open water creating a marine debris concern.

How to prepare the shrink wrap for recycling

- Remove all doors, zippers, vents, rope, ribbon strapping (belly bands), and any other non-shrink wrap materials (packing labels, etc). Doors and vents in good condition can be saved and reused. Other materials that cannot be reused should be disposed of in the regular trash or proper recycling bins.
- Keep shrink wrap **DRY** and free from dirt and other debris that can hinder the recycling process, devaluing the shrink wrap. When rolling the material, keep it as clean as possible. If necessary, roll it on a tarp or other ground covering.

How to roll and store shrink wrap

- Roll and tie into a bundle that is between 4' - 5' wide (see diagram). Rolling this way maximizes the amount of space inside the dumpster/recycling container.
- Store rolled shrink wrap in a plastic bag or other container to prevent contamination from water, dirt and other debris.

Sacrificial Anodes (Zinc)

Zinc and aluminum anodes are widely used in the marine industry to help prevent galvanic corrosion on exposed engine, steering and propulsion components.

- Check with your town recycling center or marine supply business for disposal options.

Mercury-Containing Devices

Devices like float switches and thermostats may contain mercury, a substance that creates potential environmental problems because it can accumulate in the flesh of marine organisms. Consumption of fish or shellfish with high levels of mercury may cause severe health problems.

- Dispose of mercury-containing devices through a hazardous waste disposal company; or
- Dispose of these devices as household hazardous waste on the appropriate collection days.

Shrink Wrap Plus Recycling Options

The following is a list of recycling options for shrink wrap and other materials. Visit njcleanmarina.org for updates.

 Pickup Services  Drop-Off Locations  Mail Return Services \$ Drop-Off Fee

Atlantic County

Utilities Authority

6700 Delilah Rd.
Egg Harbor Township, NJ
tel. 609-272-6950  

Burlington County

Robert Shinn Recycling Center

130 Hancock Ln.
Westampton, NJ
tel. 609-267-6889
Plastic Drums \$ 

Viking Yachting Center

5724 N. Rte. 9
New Gretna, NJ
tel. 609-296-2388 

Cape May County

CMCMUA Landfill Complex

2050 Rte. 610
Woodbine, NJ
tel. 609-465-9026 

CMCMUA Transfer Station

650 Shunpike Rd. (Rte. 620)
Burleigh, Middle Township, NJ
tel. 609-465-9026 

Cumberland County

Commercial Twp. Public Works

1768 Main St.
Port Norris, NJ
tel. 856-785-3100 

Fish and Wildlife Maintenance Facility

1670 E. Buckshotem Rd.
Millville, NJ
tel. 856-785-0455 

Fortescue State Marina

River Rd.
Fortescue, NJ
tel. 856-462-7314 

Maurice River Twp. Municipal Garage

556 Main St.
Leesburg, NJ
tel. 856-785-1120 

Millville Compost Site

999 Cedarville Rd.
Millville, NJ
tel. 856-825-7000 

Solid Waste Complex

169 Jesse Bridge Rd.
Deerfield, NJ
tel. 856-825-3700 \$ 

Morris County MUA

Lee's County Park Marina

443 Howard Blvd.
Mt. Arlington, NJ
