

Survey questions and results

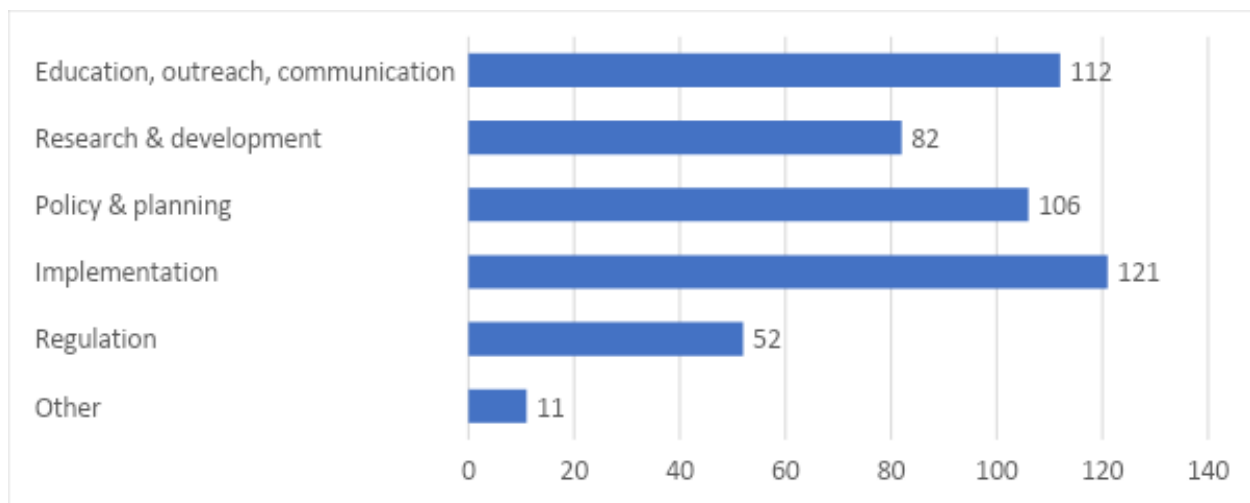

1. Which of the following best describes your organization?

Respondents could choose one option.

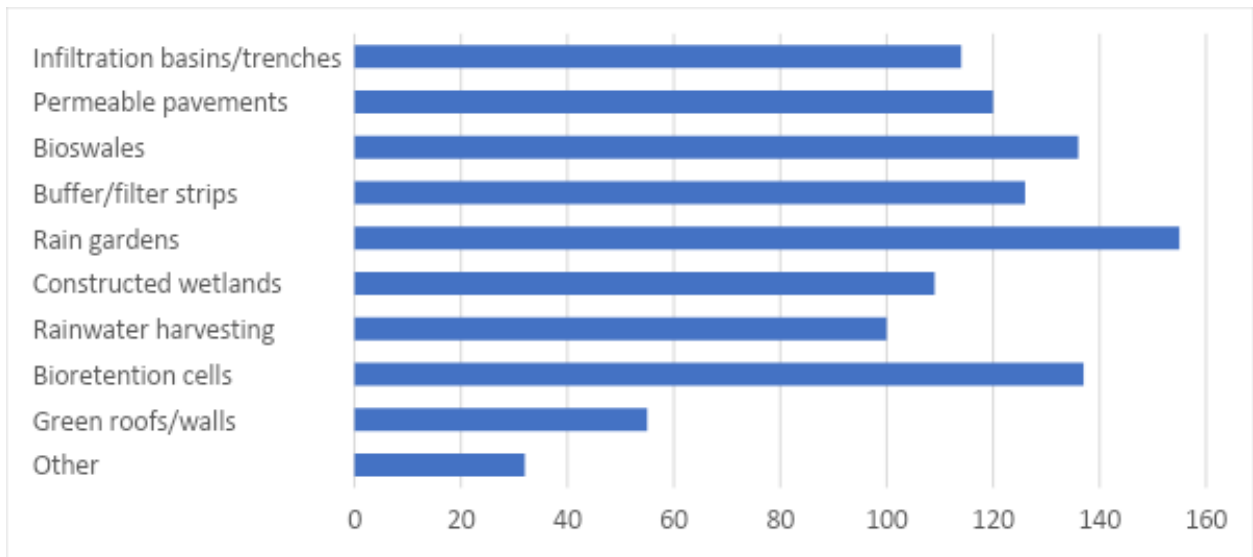

2. Which of the following best describes your experience with GI/LID?

Respondents could choose multiple options.

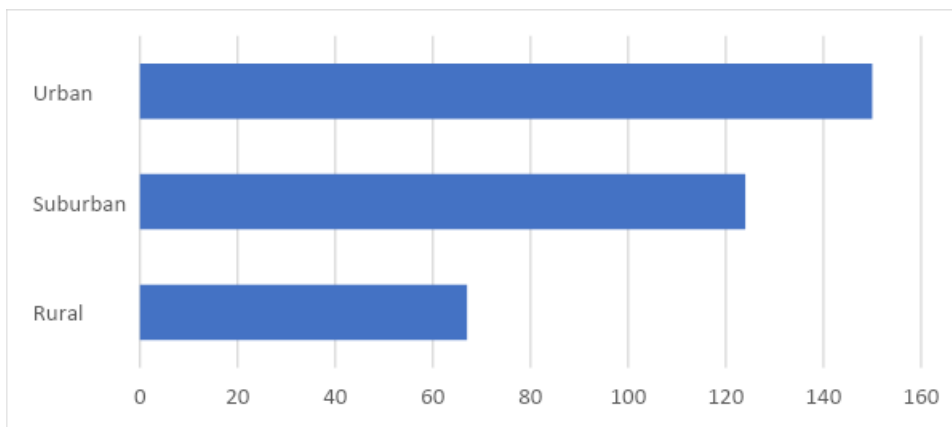

3. Select the GI/LID techniques that your organization has been applying or has the experience with.

Respondents could choose multiple options.

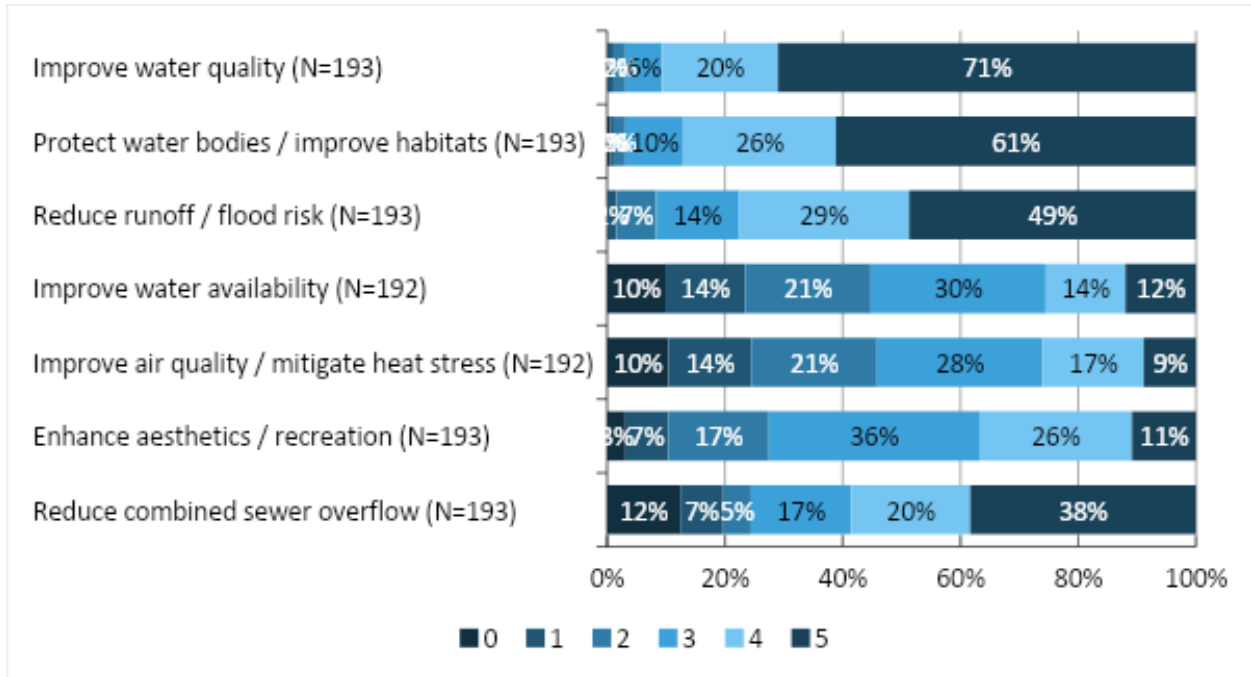

4. Describe the settings where these GI/LID techniques are being applied. Please provide the details using the space provided after the selection.

Respondents could choose multiple options.

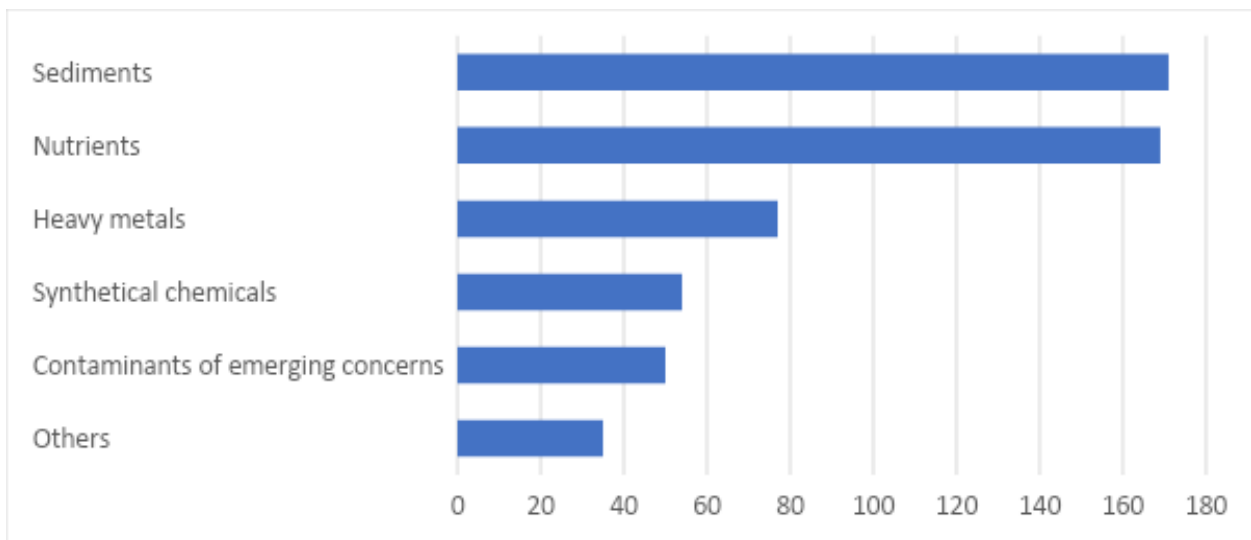

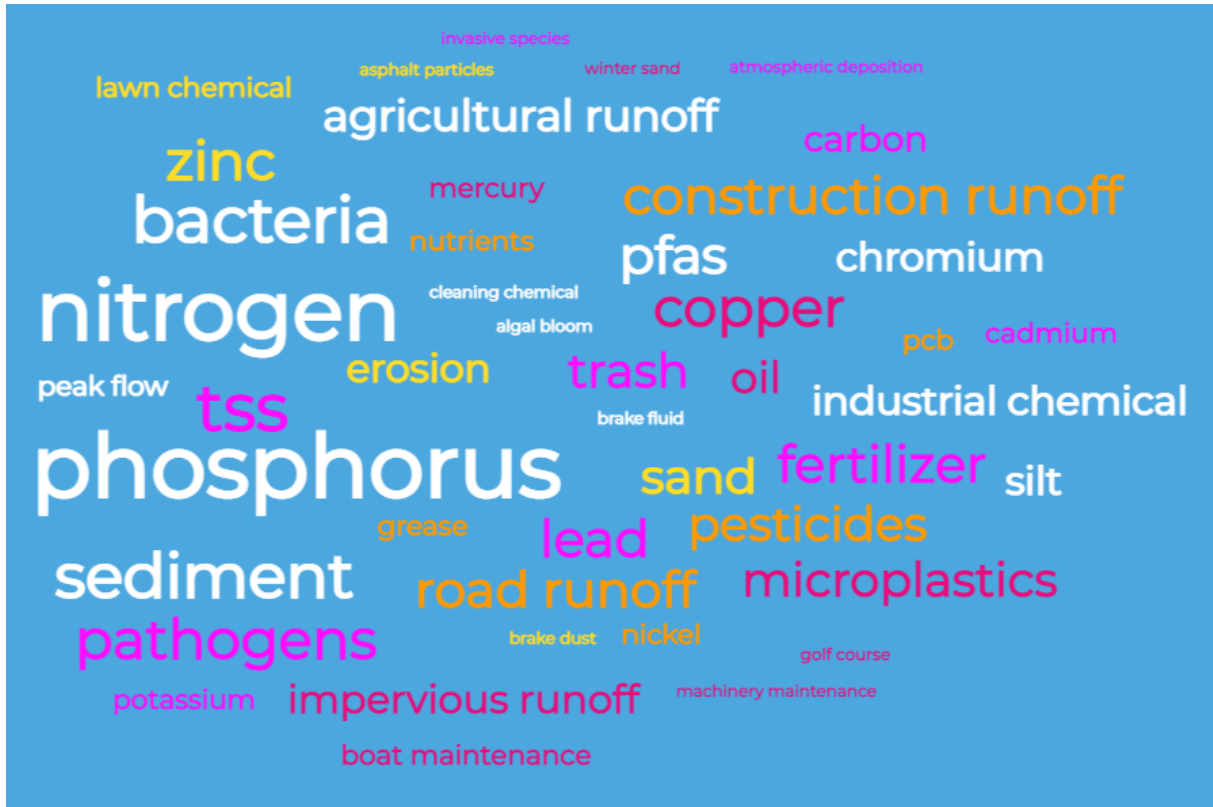

5. Please rank the importance of GI/LID benefits at a five-point Likert scale (0 – no opinion, 1 – Not at all important, 2 – less important, 3 – important, 4 – more important, 5 – very important)

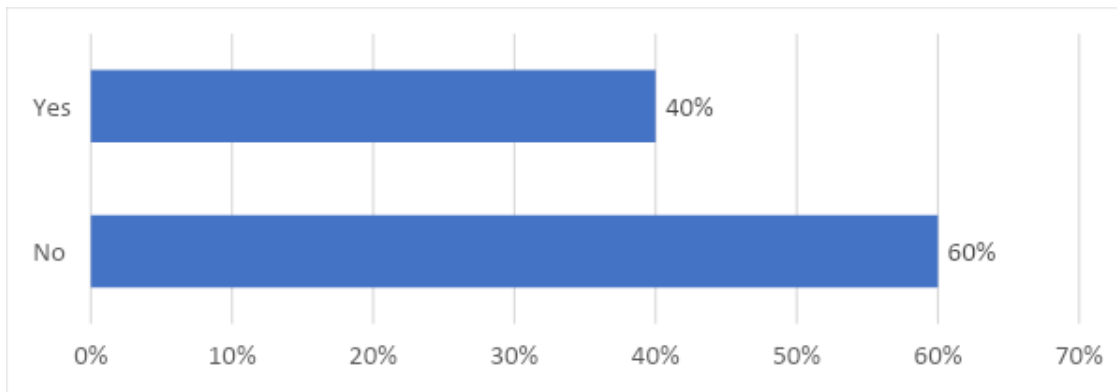

6. If the GI/LID techniques were being used to treat stormwater runoff for water quality improvement, what are the pollutants of concerns?

Respondents could choose multiple options.

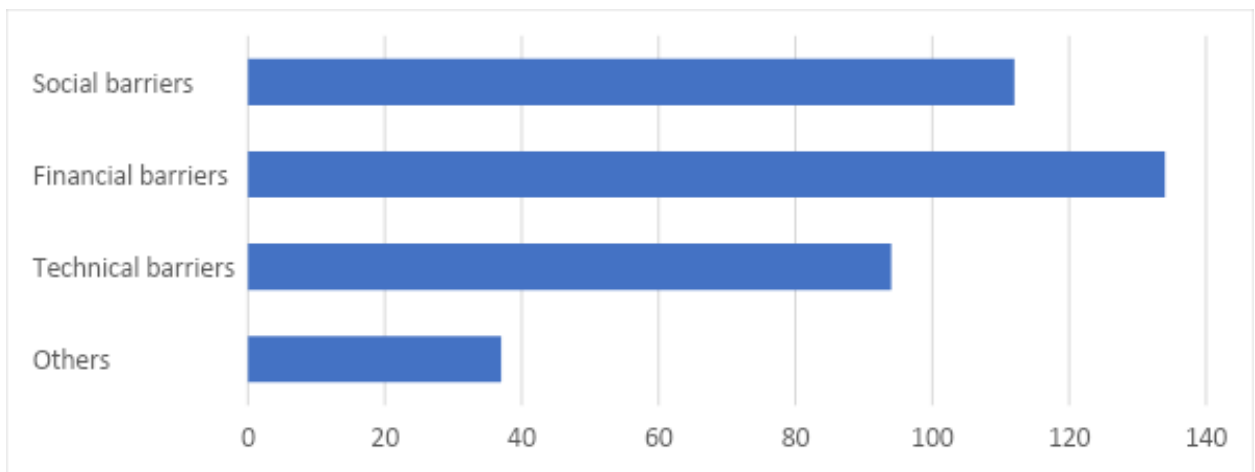

7. Have you noticed any negative impacts resulting from the applied GI/LID? If “Yes”, please describe the specific negative impacts?
Respondents could choose one option.

8. Please describe some obstacles that your organization has experienced when applying GI/LID techniques?

Respondents could choose multiple options.

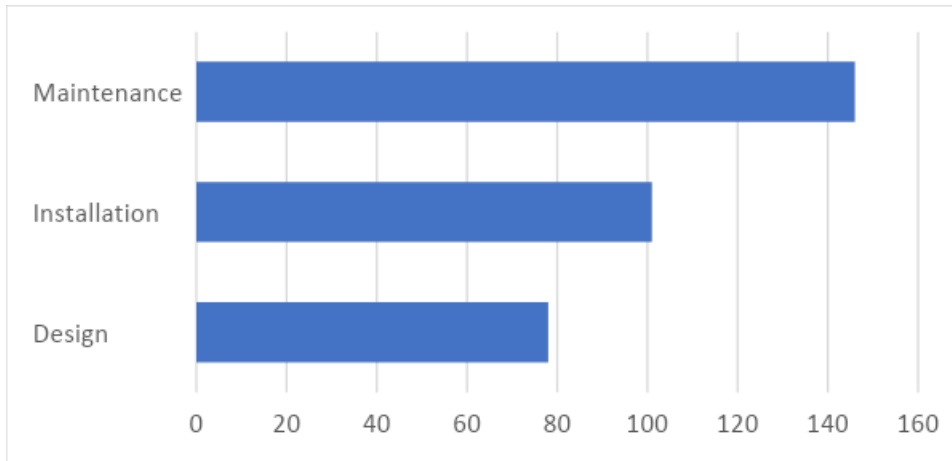

Social barriers

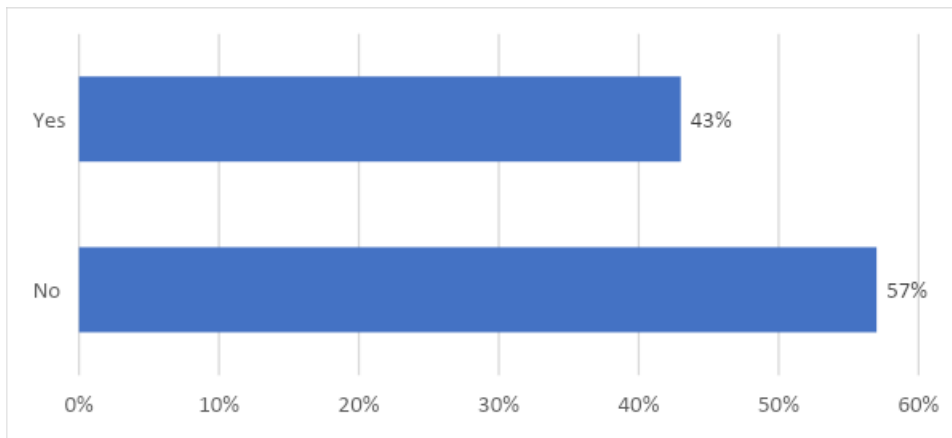

Technical barriers

9. Please describe some practical problems you experienced during the process of deploying GI/LID techniques.

Respondents could choose multiple options.

10. Does your organization have experience of applying GI/LID techniques in under-served, under-resourced, and/or under-represented communities? If “Yes”, please provide suggestions to better serve those communities.

11. In your opinion, what are the key knowledge gaps and urgent needs in research and development on GI/LID techniques?

This was an open-ended question. Respondents’ comments have been used in the prioritization of research focus areas.

12. In your opinion, what are the roles the Sea Grant Network should play to improve GI/LID deployment?

Respondents’ comments have been used in the prioritization of research focus areas, and extension and education activities.
